September 24, 2555 BC. â€" November 30, 2012 #5. You will need firmware 12.12.0-0073 or later to support CacheCade Pro 2.0 read/write. Cachecade 1.0 only has Read ... Write. For flashing, use the Upgrade.exe utility (from the Cachecade distribution kit on the website http://www.cachecade.org/) or the Upgrade.exe command from the archive with the CachecadePro.exe program. In the archive you can find all the necessary files to configure the program. For example, I used the CachecadePro.exe 2.0 distribution kit for Windows, consisting of the following files: Â· read-cache.txt â€" file with program settings. configure.dat â€" file with parameters for configuring Cachecade. fffad4f19a
