Aug 22, 2020 R-Studio 5.4 Build 134372. Nov 11, 2020 R-Studio 5.4 Build 134372. Nov 20, 2020 R-Studio 5.4 Build

134372. References External links Category:Visual programming languages Category:Software development kits

Category:Software developmentQ: Powershell script to iterate through files and remove specific content I have a script that removes the last digit from the file name using the following code \$files = Get-ChildItem \$home -Recurse -Filter "\*.txt" -File | Select-Object -ExpandProperty FullName foreach(\$file in \$files) { \$content = Get-Content \$file \$content.replace("-", "") Set-Content \$file \$content } This will correctly remove the last digit from the file name, however the.txt extension is still there
