The installed BIOS is 3.2F. The new component is an E89382 PW. .A case of reactive lymphoid hyperplasia and AID deficiency syndrome. A 9-year-old boy was referred to our hospital for evaluation of palmar erythema, eczema, and recurrence of respiratory infections. A detailed immunological examination revealed a highly decreased serum concentration of immunoglobulins and an absent response to both vaccination and infectious stimulation.

Lymph node biopsy showed multiple organized lymphoid hyperplasia similar to Castleman's disease (CD). A mutation was observed in the immunodeficiency-associated DExH box helicase 38 (AID)

---

gene. This is the first report of reactive lymphoid hyperplasia with a mutation in the AID gene. Jordan's King Abdullah II declared a six-month state of emergency in the wake of the second attack on a state building in the West Bank city of Jenin. The proclamation of emergency covers security measures, including allowing security forces to search homes and offices without warrants, and suspending residents' rights to move between different areas of the city, reported AFP. Read more "The king has ordered to put on hold the Palestinians' right to move and reside in any of the land areas of the city of Jenin... and to suspend the issuing of work permits and licenses," said a statement released by the royal palace in Amman
