He is a five-time national champion for Egypt, and a three-time Olympian. He won a bronze medal at the 2000 Summer Olympics in Sydney, representing the host nation Egypt. He also won a bronze medal in the men's lightweight division at the 1999 All-Africa Games in Algiers. El-Morshedi has coached the Egyptian wrestling team at the national level from 2000 to 2008, and is also a physical trainer and personal trainer. El-Morshedi is also a civil engineer and management consultant, and his primary career and passion is as a bodybuilder. He started lifting in the early 1990s and was introduced to powerlifting in 1998, where he quickly rose to the ranks of over 300kg in bodyweight and 300kg in total weight. I'm developing a SaaS application and I have this question: What is the best practice for deploying an updated version of the application to users? The update can be more than an just a new version of the app, it can be a bug fix, a new feature or any change. Should I deploy it all at the same time or sequentially? When to deploy it? Thanks. A: There are many
