Which is more recommended? There are only a few reviews, but I am not sure which is really recommended. I would appreciate a recommendation A: Choose the one you like better or the one that is free. Carbon and nitrogen stable isotope ratios of atmospheric deposition in urban and rural areas along the Tamar River, Israel. Sampling of atmospheric precipitation by the use of an automatic sampler was conducted in urban and rural regions of the Tamar River basin, Israel, for a period of one year to measure the stable carbon and nitrogen isotope ratios of atmospheric deposition ($\delta^{13}\text{C}$ and $\delta^{15}\text{N}$ values). The obtained results were analyzed in relation to the climatic conditions. Atmospheric precipitation $\delta^{13}\text{C}$ values were influenced significantly by the ratio of the net radiation to the precipitation (Rn/P ratio) for the period of the year. The ratio of $\delta^{15}\text{N}/\delta^{13}\text{C}$ was inversely related to the precipitation rate. In the urban region (region A), $\delta^{15}\text{N}/\delta^{13}\text{C}$ values were lower and more isotopically enriched than in the rural region (region B), where there was a high rate of precipitation. Sampling of precipitation in regions where high evaporation rates occur resulted in higher $\delta^{15}\text{N}/\delta^{13}\text{C}$ values than in regions with lower evaporation rates. The $\delta^{15}\text{N}/\delta^{13}\text{C}$ values in region A were positively correlated with rainfall amount and the humidity index. The ongoing investigation into the disappearance of the Chinese ambassador in Burkina Faso was apparently concluded. The Ministry of Foreign Affairs said in a statement on Tuesday that a report into the case had been handed in by the National Commission for the Management of Missing Persons and Foreigners. The report has not been made public. The statement also said that Burkina Faso is "fully ready to cooperate with the investigation by the Chinese side". The ambassador to Burkina Faso, Zhou Pingjian, has been missing since Friday. The ambassador's car was found burnt out on Monday in the town of Ouagadougou and his body was found later in a septic tank in the same area. An eyewitness told the AFP news agency that Zhou had been dragged out of his vehicle and beaten up by three men before being burned alive. Police in Burkina Faso say there is no "indication" that the ambassador's death was politically motivated. The Chinese foreign ministry and Chinese embassy
