May 20, 2019 It also helps in adjusting hue, saturation, brightness etc. It lets you to add and remove details selectively . Jan 5, 2020 Bidi which is in Python 3 is available now. As it is used widely in different languages for example for writing Bidi scripts in Arabic.[Influence of ionizing radiations on proteoglycans. II. Functional consequences and cytological localization]. Influence of X-rays on synthesis and secretion of proteoglycans and their localization in the nucleus were investigated. It is shown that X-rays decrease the synthesis of proteoglycans with a simultaneous increase in the content of monosulfated fractions in the cells. On the basis of the established differences in the content of proteoglycan fractions before and after irradiation of cells it was concluded that the synthesis of the proteoglycans is controlled by the postsynthetic modification of the protein core of these glycoproteins. After X-irradiation localization of the proteoglycans takes place in the nuclei. It is assumed that proteoglycan synthesis can be regulated by external factors, for example by their interaction with chromosomal proteins or their effect on histone-mediated gene activation.Q: Javascript Ajax - Call function on return success I have a function to get result from database then call a function to complete a form, here is my code : \$('#fetch').on('click',function(e){ e.preventDefault(); var photo = \$('#pic').val(); var photo_unique = 3; var data = \$('#searchForm').serialize(); \$.ajax({ type: 'POST', url: 'db/search.php', 3ef4e8ef8d
