----- CleanMyPC is very easy to use and perform all desired Cleaning tasks, but you may take a little time in getting used to it. Using CleanMyPC for the first time or following basic instructions may be tricky, but once you have perfected the basics of cleaning a Windows PC there is no limit to what you can do! Instructions: 1. Press the Start button and type C:\ in the search box. If you are not using Windows 10, the program may start from the desktop. If you have multiple search boxes on the desktop, choose one and look for the File option, which appears in the bottom left-hand corner of the window. 2. Select CleanMyPC - Advanced Options. 3. Click on the first option in the list. 4. Click on the Clean Now button. 5. Click on the Next button. 6. Click on the Start button. 7. Wait until your computer is done cleaning your files. * User can specify a destination folder to move the files to that were cleaned. * The program will move all files found, and be able to rename the entire directory structure. * CleanMyPC's version 7 and later do not require you to do this step. CleanMyPC, in version 7 and later, will move the files out of the destination specified at the Advanced Options screen instead. * Clients suffering from low disk space or with the "Unavailable Disk Space" problem (which is caused by logfiles). 7) You must manually delete junk files from the destination folder for CleanMyPC to function properly. C:\Users\MyName\AppData\Local\Temp 8) Restart the computer

System Requirements For CleanMyPC:

Windows 10 64-bit or later; 8 GB RAM Aspect Ratio Full screen
Author's Note: This is my first comic since my Daze Your Mind comic days. I wanted to do a comic that was a bit more in-depth than my other ones, and I believe this comic was very much in that vein. It was also, however, a lot more in-depth than I would have liked. I'd like to thank those who have been patient and still read! -B'
