What's New In Reginald?

Reginald is a program launcher designed to help the user become more productive and improve the overall experience. Screenshots: Use Reginald to quickly launch applications, adjust system settings, open browser links, and a lot more. Instead of launching applications one at a time, like in the Windows search bar, Reginald starts them all at once in a row. And you don't even have to wait for them to open up. Just type in a keyword, and you're good to go. Add preset keywords to Reginald to launch applications, adjust system settings, open browser links, and more. Choose from more than 100 pre-defined functions, each with customizable keyboard shortcuts. Add program launchers to your desktop. Reginald will launch a program at once when a keyword is typed in. You can also add Reginald as your default program launcher by adding an additional keyword. Reginald can display your IP address, time, and stock information, just by typing in a keyword. Choose from dark or light themes to customize the look of the app launcher. Your saved search results are automatically sorted into application, game, or settings groups. Reginald is customizable: you can customize key mappings, shortcuts, mouse gestures, and more. Start typing or assign key presses to launch specific apps or open browser links. Use the timer to remind you of important duties, like replying to messages or paying a bill. Never miss an important message or update again! You can use Reginald to open your mail inbox, or just type in the keyword and send yourself a message. You can also use Reginald to instantly open any browser link you want. Simply add a keyword and you'll have instant access to a whole new world of possibilities. If you want to keep Reginald at your fingertips and close at hand, add it to your desktop by dragging it to your taskbar. Create your own keywords and launch applications using them. You can assign as many keyboard shortcuts as you want to any of the saved keywords. Remove unwanted applications from your system. Add as many programs as you want to the ignore list. *Work only on Windows 2000 or above. **Work only on Windows Vista or above. ***Work only on Windows 7 or above. ***Work only on Windows 8 or above. ****Work only on Windows 10 or above. ****Work only on Windows Server 2012 or above. ****Work only on Windows Server 2016 or above.
