QuuSoft Junk File Cleaner [March-2022]

KeyMacro is an advanced keylogger tool to record everything you type on your computer, and you can also define which text should be captured, such as passwords, account numbers and passwords, and anything else you may need for a safe record. When you are finished with the logging, you can send the recorded files in various formats, such as txt, bin, html, etc. KeyMacro logs any keystroke, logins and any mouse click that happens on your computer. Unlike other keyloggers, KeyMacro does not require administrator permissions, and does not require any setup on your part. Your computer and IP address will be logged automatically at regular intervals, according to your settings. KeyMacro is a powerful tool which can be used to collect sensitive data like account passwords, bank account details, credit card numbers and much more! NOTE: It is available for Windows 2000, XP, Vista, Windows 7, 8 and 10 as a portable application and as a Windows service KeyMacro is an advanced keylogger tool to record everything you type on your computer, and you can also define which text should be captured, such as passwords, account numbers and passwords, and anything else you may need for a safe record.
