KeyMACRO is a macro designer for Lotus Notes that allows to create Macros which can be used to store Macros or parameters in a form for easy access when the Lotus Notes database is closed. In addition to using KeyMACRO, the macro developer has the option to generate other files, such as MSOffice, which can be used to easily read the generated data. KEYMACRO provides a fully featured editor and can load and save macros and their parameters to and from all types of files. KEYMACRO has a list view, a grid view, a tree view and a diagram view that allows you to quickly design the macro. The tree view also allows to create and open the created macros. KEYMACRO offers a lot of options to choose from, such as defining the language used to save the data and the formatting style of the generated files. KEYMACRO currently supports MSOffice as well as the Lotus Notes database format. Logic was created as a basic unit that is independent of the presentation format in Lotus Notes. Logic is very powerful in the sense that you can create and use native development environments that directly relate to its content, and it is one of the most innovative and powerful features in Lotus Notes. The presentation languages for Logic, also called Logic Props, include HTML, XML, Java, JavaScript, PHP, Java Script, and XML. This course covers the fundamentals of the logic language for developers with less than a year of experience in Lotus Notes. It consists of lectures and demonstrations, and the author has provided additional resources for practice. Sun Notes Migration is an easy-to-use software which can copy data from Lotus Notes to Outlook and vice versa. It enables users to convert Notes databases to Outlook Express (.mbox) format or to transfer data from a Notes database to the MS Exchange Server 5.0/2000. The program was created to simplify the migration of both personal and company databases to Microsoft Exchange Server. It can convert Notes databases to outlook.mbs and mail.mbx format and all data is kept intact. The program supports conversion between native Notes databases, compressed Outlook databases (.pst), and other databases (RDBMS). It can also extract personal and company data from Notes databases into .pst or .mbox format, and then migrate it to MS Exchange Server or to other similar email applications. Conversion is always done with the highest level of accuracy.

SysTools Notes Migration Description: Notes Shredder is a powerful utility designed to securely remove all data from a Notes database. Data can be deleted from the Notes database or converted into an archive file which can be easily deleted. You can save all the conversion information in a format that you can use to convert data to any other format. In addition, Notes Shredder can migrate contacts from Notes to Outlook, EML, and Microsoft Outlook Express (MIME format). The program can also move data from Outlook Express (.mbox) to Lotus Notes. Note that Notes Shredder does not overwrite the original database. The original notes and contacts are not modified. The program does not break your database structure. SysTools Notes
